About MDL

Mineral Deposits Limited (ASX: MDL) is an Australian based mining company in the business of finding, mining and processing mineral sands resources.

MDL owns 50% of TiZir Limited which owns the world-class Grande Côte Mineral Sands Project in Senegal, West Africa and an ilmenite upgrading facility in Tyssedal, Norway.

Grande Côte, with construction now more than 55% complete, is anticipated to produce on average approximately 85ktpa of zircon and 575ktpa of ilmenite (and small amounts of rutile and leucoxene) when in full production over an expected mine life of at least 20 years. Production is expected to commence late-2013.

The Tyssedal ilmenite upgrading facility smelts ilmenite to produce a high-TiO₂ titanium slag which is sold to pigment producers and a high purity pig iron which is sold as a valuable co-product to ductile iron foundries. The facility currently produces approximately 200ktpa of titanium slag and 110ktpa of high-purity pig iron.

Once Grande Côte reaches expected average production rates, TiZir will be producing approximately 7% of both global zircon and titanium feedstock supply.
